windows 7 Why use Microcode  
Studio: It is important to note  
that the IDE comes with many  
features which other IDEs don't  
have. It is possible to customise

---

the entire look of the IDE using skins, themes and icon sets. You can change the colour scheme for documents, bookmarks, files, open windows, menus, buttons, labels, scroll bars, toolbars, gutter region, indicators and more. It is even possible to set the colour scheme for the code explorer and properties windows, the text in code explorer windows, tools in the

---

toolbox, text in files, screen magnification and much more. You can adjust anything you want via the Preferences dialogue which is right-click menu accessible. With a clean, comfortable and configurable IDE it is more than likely that you will get an editor which fits your style, and you will no longer have to spend time finding it which is what a lot of users tell us is the biggest
